

Description

The **Vista™ MX** media station provides VTEL power in a compact size. In the VTEL tradition, **Vista™ MX** is a videoconferencing system with an integrated Windows® PC. Use familiar PC tools and applications in a video call or out of a call. With three USB ports, it's easy to plug USB devices into **Vista™ MX**. **Vista™ MX** is ideal for individuals or small groups. Use it at home, in the office, conference room or classroom. It includes an easy-to-use, wireless, hand-held remote control and VTEL collaboration tools. With optional wireless LAN capability and easy set-up, **Vista™ MX** can be your truly portable media station. Works over Internet Protocol (H.323) or ISDN (H.320).

Product includes videoconferencing codec, integrated Windows® PC with Local Area Network (LAN) connection, VTEL videoconferencing software and collaboration tools, CD-ROM drive, three USB ports, integrated pan-tilt-zoom video camera, omni-directional microphone, wireless hand-held remote control.

Applications

- Videoconferencing, collaboration, and data sharing for individuals or small-to-medium groups.
- Meetings and distance learning sessions for corporations, government agencies, other enterprise organizations.
- Distance learning for K-12, colleges and universities, adult education, continuing professional education and training.

Benefits

- High-quality audio and video conferencing with integrated Windows® PC
- Portable – easy to set up, use, and move
- Includes easy-to-use, wireless, hand-held remote control
- Systems are dual monitor ready and are S-Video and VGA capable
- Can use familiar PC applications and tools in or out of a video call
- Support H.323 (Internet Protocol) and H.320 (ISDN) communications
- Powerful VTEL collaboration tools for slide creating, annotating, sharing, and sending
- Standard Warranty is 3 Year parts (15 day return to factory) and 3 Year VTEL authored software
